

Objective

The customer journey map illustrates how a farmer interacts with the Opti Crop application from opening the app to receiving a crop recommendation. It identifies user actions, touchpoints, thoughts, emotions, process ownership, and opportunities for improvement.

Stage 1 – Open the Application

Action:

- Farmer opens the Opti Crop application.

Touchpoint:

- Login/Home Page

Customer Thought:

- "Can this app help me choose the right crop?"

Customer Feeling:

- Curious and Interested

Process Owner:

- Farmer

Improvement Opportunity:

- Simple registration and user-friendly interface.
-

Stage 2 – Enter Soil and Weather Data

Action:

- Farmer enters soil nutrient values (N, P, K), pH, temperature, humidity, and rainfall.

Touchpoint:

- Data Input Form

Customer Thought:

- "I hope the information I entered is accurate."

Customer Feeling:

- Hopeful

Process Owner:

- Farmer

Improvement Opportunity:

- Input validation and easy-to-understand data entry.
-

Stage 3 – Receive Crop Recommendation**Action:**

- The AI system analyzes the data and recommends the most suitable crop.

Touchpoint:

- Recommendation Results Screen

Customer Thought:

- "This recommendation looks useful for my farm."

Customer Feeling:

- Satisfied and Confident

Process Owner:

- AI Recommendation System

Improvement Opportunity:

- Improve prediction accuracy and provide additional farming suggestions.
-

Summary

The customer journey demonstrates a simple three-step process:

1. Open the application.
2. Enter soil and weather information.
3. Receive an AI-based crop recommendation.

By improving usability, prediction accuracy, and recommendation quality, Opti Crop helps farmers make informed decisions, improve productivity, and achieve better crop yields.
